Flavon communicates to the data subject a personal data breach, without undue delay, where that personal data breach is likely to result in a high risk to the rights and freedoms of the natural person in order to allow him or her to take the necessary precautions. After Flavon becomes aware of a personal data breach, Flavon ascertains whether all appropriate technological protection and organisational measures have been implemented to establish immediately whether a personal data breach has taken place and to inform promptly the supervisory authority and the data subject. To this end, the director, as the representative of Flavon, summons the members, all people processing data, as well as the external IT expert in 24 hours after the incident to determine the cause, to create action plans about the performed and upcoming tasks and to take action to prevent such incidents happening again.
