

FLAVON

Research in Finland

Health and nutrition program
in Finland (1972-1997)

- reducing saturated fat intake
- increasing fibre intake
- increasing fruit and vegetable consumption

■ 1972 ■ 1997

Source: Puska, P. (2000), Acta Cardiol 55 (4), 213-220

Fruit and vegetable consumption

- Fresh fruits: 4-5 portions a day (400-700 g)
- Raw vegetables: 4 portions a day (500-700 g)

Fruits and Vegetables

Consuming fruits and vegetables is of paramount importance **for the optimal functioning of our body**. They are sources of nutrients which contribute to the strengthening of our intestinal and immune system. Their positive effects can be attributed to biologically active substances, like vitamins, fibres, proteins, antioxidants and polyphenol-type compounds. With our daily nourishment we get access to only some of these protective components. **Flavon products can help ensuring that we consume a wide range of fruits and vegetables of high quality.**

Important active substances of Flavon products: polyphenols, within that flavonoids, carotenoids, organic compounds containing sulphur and nitrogen (chlorophyll, beta-carotene, lycopene and lutein).

Plant Oils

Various fatty substances are important energy sources of the body. They include fatty acids of plant origin which are indispensable for our healthy life, for example the **essential omega-3 and omega-6** polyunsaturated fatty acids. Our body alone cannot produce them, so **their intake must be ensured primarily by nutrition. Cold pressed oils used in our products are ample sources of these physiologically important fatty acids.** In addition, they are full of beneficial active substances, rich in vitamins, polyphenols, carotenoids. Plant oils in our products have significant physiological, synergistic and antioxidant effects.

Prof. Dr. Zoltán Dinya:

Scientific advisor – doctor of the Hungarian Academy of Sciences

He studied at the University of Debrecen, and for 30 years he was working with academician Dr. Rezső Bognár. His area of research is the plant compounds, their analytics and physiological effects. In that respect he has focused mostly on **polyphenols and flavonoids**. During his career he has written over 200 scientific publications. He has spent a long time in several countries of the world participating in various research programs and projects, and is doing so to date. He was a friend and shared a professional relationship with Nobel-laureate researcher, Albert Szent-Györgyi.

He has been working with Flavon since 2005 and he provides scientific background to product development ever since.

The main guideline of his life: contribute to healthy aging with proper nutrition, lifestyle and dietary supplements.

Our Nobel-Prize Heritage: Flavonoids

Albert
Szent-Györgyi

He was a Hungarian physician, biochemist, member of the National Academy of Sciences both in Hungary and in the United States, acclaiming world fame to Hungary. **In 1937 he was awarded a Nobel-prize for isolating vitamin C and researching its physiological effects.**

In the early 1930s in Szeged (Hungary), from a phytogenic source (from paprika), he isolated vitamin C and provided a sample for defining its chemical structure. He also researched the physiological effects of vitamin C and citrus flavonoids, and made a breakthrough achievement in understanding the biochemistry of muscular work.

He came across **bioflavonoids** as a result of his observations while discovering vitamin C.

He was an exceptional scientist and his students adored him. For 93 years he was obsessed with researching the secret of life. He was an excellent athlete, he played tennis, rode motorcycle and horses, at the age of 70 he learned windsurfing. His inspiring personality captivated everyone.

Nutrigenetics

Nutrigenetics: a science studying the relationship between the human genome and nutrition intake.

Epigenetics: the study of heritable changes of the genome, due to the environmental factors the parents were subjected to.

Telomers: a short multi-repetitive sequence on the two ends of the DNA, the length of which depends on nourishment and lifestyle.

Plant compounds acting in synergy - like in Flavon products - positively impact our genetic stock, thus our body, by their special protective effects; as it has been proven by several scientific publications.

Raw Materials & Production

Verified raw materials from safe suppliers and pure sources.

In order to attain a higher active ingredient content (like vitamins, minerals, polyphenols and flavonoids), all the vegetables and fruits that we use in our products are harvested when they are biologically ripe and not in their commercially best condition.

Our **patented supplements** are produced by a **special procedure and technology**. All phases – from the procurement of raw materials, through production, packaging, quality control, storage, etc. – is in one hand, in one place, at our own production facility.

IFS Food quality management system: quality management is the basic pillar of permanently high quality and safe food production. Flavon chose IFS Food's evaluation system, one of the most rigorous and most diverse schemes, which is the **extension of the ISO standard** with further requirements.

GLUTEN FREE

COLLAGEN

BY FLAVON

BASIC

Hydrolysed bovine collagen peptides, dietary supplement in powder form.

It is a pure protein, which is

- ✓ easily digestible,
- ✓ natural,
- ✓ free of sugar, fat, cholesterol and carbohydrates,
- ✓ free of additives and preservatives,
- ✓ free of artificial colours, flavours and sweeteners,
- ✓ gluten-free,
- ✓ GMO-free.

GLUTEN FREE

GLUCOSAMINE & CHONDROITIN COMPLEX BY FLAVON

BASIC

Food supplement capsule containing glucosamine sulphate, chondroitin sulphate, vitamin C, calcium, zinc and collagen.

Taking care of our joints and bones is essential for enjoying the freedom of movement for as long as possible. This care is not related to any age group. The earlier we start to take care of it, the more it pays off.

Movement is health, movement is joy, movement equals life.

MG + B6

BY FLAVON

BASIC

Food supplement capsule containing magnesium bisglycinate and vitamin B6.

Magnesium contributes to

- ✓ a reduction of tiredness and fatigue
- ✓ electrolyte balance
- ✓ the normal functioning of the nervous system and general psychological functions
- ✓ normal muscle function
- ✓ the maintenance of bones and a healthy skeleton
- ✓ the maintenance and strengthening of teeth

FENU-C+

BY FLAVON

PREMIUM

Liposomal vitamin C dietary supplement capsule using FENUMAT™ technology.

Vitamin C is essential for the healthy functioning of our body, but the body cannot produce it and has limited capacity to store it.

So, we should watch the way, form and dose of supplementation.

The liposome protects the vitamin during the digestive process, contributing to better absorption of more active ingredients.

Through the so-called FENUMAT™ technology, a high local concentration is delivered to the intestines for the best possible absorption.

IMMUNE BY FLAVON

PREMIUM

Immune by Flavon capsules contain vitamins, minerals, plant extracts and an outstanding source of dietary fibre, inulin.

A strong, well-functioning immune system is the cornerstone of our overall health; a balanced diet and taking dietary supplements can help to achieve it.

FLAVON

COMPLEX PACK

FITNESS

VEGAN PROTEIN + CARB MATRIX

Dietary supplement with mineral complex and vitamins.

It is a powder-based product which, when dissolved in water, can provide all the nutrients you need to get from a meal.

MINIMUM REQUIREMENTS & MAXIMUM PAYOUT

Compensation

At Flavon, **65%** of the carton's base price* is paid to the members. No leadership qualification is needed, **everyone is entitled to the 60% basic commission!**

*base price: 120 EUR

60%
basic commission

+

5%
leadership
bonus

QUICK START: 60%

Sponsors earn quick start bonus on 6 active levels in the new members' first two months, from their purchases.

$$60\% = 20\% + 10\% + 10\% + 5\% + 5\% + 10\%$$

TOTAL: 3 744 EUR

The chart above is an imaginary realization of Quick start system, an illustrative mathematical model. In reality, the network structure is never built up this way, the actually attainable income depends on the set-up of the network and the members' activity.

Gift Carton

40 quick start points: **1 gift carton**
80 quick start points: **2 gift cartons**
120 quick start points: **3 gift cartons**

15 NEW MEMBERS = 45 POINTS

1st level: $6 \times 24 \text{ EUR} = 144 \text{ EUR}$

2nd level: $8 \times 12 \text{ EUR} = 96 \text{ EUR}$

3rd level: $1 \times 12 \text{ EUR} = 12 \text{ EUR}$

+ 1 GIFT CARTON (158 EUR)

410 EUR

18 NEW MEMBERS (INCLUDING **2 VIP**) = 82 POINTS

1st level: $4 \times 24 \text{ EUR} + 2 \times 136 \text{ EUR} = 368 \text{ EUR}$

2nd level: $9 \times 12 \text{ EUR} = 108 \text{ EUR}$

3rd level: $3 \times 12 \text{ EUR} = 36 \text{ EUR}$

+ 2 GIFT CARTONS (316 EUR)

828 EUR

VIP Membership (L-Position)

You can become **VIP Member** by purchasing 8 cartons at once.
In this case the **price of one carton of Flavon is 137 EUR.**

- **Leadership business position (L-position)**
- **Option for a double payback**
- Leadership reports in Back Office
- Own web-site with an optional name
- VIP pin
