Subject: Regarding a notification of import/marketing of food supplement.

On the 13th of November 2008 the Icelandic Food and Veterinary Authority (MAST) received a notification from Flavon Group Kft., on the basis of the 9th paragraph of the Icelandic directive nr. 624/2004 regarding food supplements, of import/marketing of Flavon Max dietary supplement.

MAST confirms the reception of the notification. As written on the notification form the reception of the notification does not imply EFA's approval of the product, the purpose is to have a perspective of the food supplements that are marketed. When such notifications are received, information of ingredients of the product and what may be missing in the labeling of the product is entered into a database with the Public Health Authority can access. The purpose of this database is to ease the supervision of food supplements on the market in Iceland.

On behalf of the Icelandic Food and Veterinary Authority,

Katrín Guðjónsdóttir
