

# Flavon<sup>®</sup> max

*The first member of the Flavon max product line was launched on the European market in 2004. Since then several hundred thousand satisfied consumers have been proof of its excellent effects and quality. Contrary to previous practice, Flavon max delivers its ingredients not in the form of a tablet or powder, but in the form of a jelly-like product, which is remarkably tasty and easy to consume.*

## The consumption of Flavon max is recommended for everyone

- ☞ *who considers their own and their family's health important,*
- ☞ *who wants to supplement their current diet,*
- ☞ *who does not eat enough fruit and vegetables,*
- ☞ *who would like to enjoy the advantages of a product developed for the people of the 21<sup>st</sup> century.*

**Ingredients:** blackcurrant (fruit), blueberry (fruit), black elderberry (fruit), red grape (fruit), beetroot (root) juice concentrates; fructose; sea buckthorn (fruit) pulp (3 %); vitamins: ascorbic acid (vitamin C), D,L-alpha-tocopherol (vitamin E); ground sea buckthorn pulp, seed and peel (0.5 %); ground Panax ginseng root (0.5 %); thickening agent: apple pectine.

Over the past years the members of **Flavon product line** have received several recognitions.

The first 5 members won the **Hungarian Quality Product Award<sup>®</sup>** in 2011, while Flavon max Plus+ received **Grand Gold Award of the international Monde Selection<sup>®</sup>** in 2012.

Parents have to make sure that their children get all the vitamins, minerals and other substances indispensable for a growing organism. When producing Flavon kids we always make sure to use only fruit juice concentrates that have adequate active substance content from fruits that were grown in the "purest" environment possible. The product also contains several vitamins, which further enhances the value of Flavon kids.

### Why do we recommend Flavon kids?

- ☞ because the majority of children do not consume enough fruit and vegetables every day,
- ☞ because it contains nutrients that are necessary for a developing organism,
- ☞ because it does not contain preservatives,
- ☞ because thanks to the unique manufacturing procedure most of the active substances of the fruits used are successfully transferred to the product.

**Ingredients:** blackcurrant (fruit), sour cherry (fruit), blackberry (fruit), beetroot (root), blueberry (fruit) juice concentrates; fructose, sea buckthorn (fruit) pulp (4.5%); vitamins: ascorbic acid (vitamin C), niacin (vitamin B3), pantothenic acid (vitamin B5), pyridoxine (vitamin B6), riboflavin (vitamin B2), thiamine (vitamin B1), folic acid, biotin (vitamin H), cobalamin (vitamin B12); ground sea buckthorn (fruit) pulp, seed and peel (1.3 %); thickening agent: apple pectine.

Flavon max Plus+ is the premium member of our product line. It is an exclusive product designed for adults who are at "risk" because they are subjected to serious strain, and for whom regular vegetable and fruit intake is of high priority because of their lifestyle. Thanks to the two new ingredients, namely pomegranate and acerola, this product contains 50% more vitamin C and plant pigment than Flavon max.

### The consumption of Flavon max Plus+ is recommended for

- ☞ athletes who undergo a greater oxidative stress during trainings,
- ☞ entrepreneurs and managers who do not eat regularly, work 12-16 hours full time and who are subjected to stress and burden of duty,
- ☞ those who pay extra attention to their health and condition of their body.

**Ingredients:** pomegranate (fruit), black elder (fruit), red grapes (fruit), blackcurrant (fruit), blueberry (fruit), beetroot (root), acerola (fruit) juice concentrates; fructose, sea buckthorn (fruit) pulp (3%); vitamins: ascorbic acid (vitamin C), D, L-alpha-tocopherol (vitamin E); ground sea buckthorn pulp (root), seed and peel (0.5%); ground Panax ginseng (root) (0.5%); thickening agent: apple pectine.

We all know that regular vegetable consumption has beneficial effects on our general well-being. Nevertheless, only a few of us consume the minimum recommended amount of vegetables every day. Flavon Green is a new and revolutionary product which will give new meaning to vegetable consumption and will completely reshape previous habits. We can cover part of our daily recommended vegetable intake with just one spoonful of Flavon Green.

### The consumption of Flavon Green is recommended for everyone

- ☞ who fails to pay attention to consuming the proper amount of vegetables every day,
- ☞ who considers it important to consume vitamins and minerals from a pure source,
- ☞ who is a conscientious consumer,
- ☞ who would like to consume vegetables in a brand new form.

**Ingredients:** juice concentrates and vegetable powders (grape- fruit (fruit) juice concentrate, carrot (root) juice concentrate, sea buckthorn (fruit) juice concentrate, Arthrospira Platensis (alga spirulina) powder, wheatgrass (leaf) powder, parsley root powder, celery root powder, spinach (leaf) powder, broccoli (flower) powder, green tea (leaf) extract, garlic (bulb) juice concentrate); fructose; vitamin: vitamin C (ascorbic acid), thickening agent: apple pectine.
